## MATHEMATICS PROGRESSION: Grade3 to 7

In September 2020, teachers will be working hard to create a space that is safe and welcoming for all learners no matter the location of their “classroom”. The first weeks will still be a time to establish a sense of community, engage learners in rich interactive experiences to promote critical thinking and create opportunities for collaboration and discussion. This is an opportune time to develop a culture and a climate for mathematics learning, conducive to collaboration, risk taking and inquiry.

The **Foundational Outcomes** identified in this document represent outcomes determined to be relevant for future learning in mathematics. Decisions about foundational outcomes were made in consultation with teachers, provincial mathematics team, Board and Regional Centre staff. The foundational outcomes are meant to guide teachers in making decisions about creating learning experiences that will prepare and engage their learners in a responsive way. However, a teacher’s professional judgment remains the most important guide to effectively responding to the needs of their learners.

Colour coding has been used to identify outcomes and indicators as foundational (**green**), optional (**orange**) or non-foundational (**red**) for the 2020-2021 school year.

NUMBER PROGRESSION: WHOLE NUMBERS					
TOPIC	MATHEMATICS 3	MATHEMATICS 4	MATHEMATICS 5	MATHEMATICS 6	MATHEMATICS 7
<b>SAYING NUMBER SEQUENCES, MEANINGFUL COUNTING, AND SKIP COUNTING</b>	<p><b>N01</b> Students will be expected to say the number sequence forward and backward by</p> <ul style="list-style-type: none"> <li>▪ 1s through transitions to 1000</li> <li>▪ 2s, 5s, 10s, or 100s, using any starting point to 1000</li> <li>▪ 3s, using starting points that are multiples of 3 up to 100</li> <li>▪ 4s, using starting points that are multiples of 4 up to 100</li> <li>▪ 25s, using starting points that are multiples of 25 up to 200.</li> </ul>	<p><b>N02</b> Students will be expected to compare and order numbers to 10 000.</p>	<p><b>N01</b> Students will be expected to represent and partition whole numbers to 1 000 000.</p>	<p><b>N01</b> Students will be expected to demonstrate an understanding of place value for numbers greater than one million and less than one-thousandth.</p>	<p><b>N07</b> Students will be expected to compare, order, and position positive fractions, positive decimals (to thousandths), and whole numbers by using benchmarks, place value, and equivalent fractions and/or decimals.</p>

	<b>N03</b> Students will be expected to compare and order numbers up to 1000.				
<b>REPRESENTING AND PARTITIONING WHOLE NUMBERS</b>	<b>N02</b> Students will be expected to represent and partition numbers to 1000.  <b>N04</b> Students will be expected to estimate quantities less than 1000 using referents.	<b>N01</b> Students will be expected to represent and partition whole numbers to 10 000.	<b>N01</b> Students will be expected to represent and partition whole numbers to 1 000 000.	<b>N01</b> Students will be expected to demonstrate an understanding of place value for numbers greater than one million and less than one-thousandth.	<b>N07</b> Students will be expected to compare, order, and position positive fractions, positive decimals (to thousandths), and whole numbers by using benchmarks, place value, and equivalent fractions and/or decimals.
<b>COMPARING AND ORDERING WHOLE NUMBERS</b>	<b>N03</b> Students will be expected to compare and order numbers up to 1000. <b>N03.03 identify errors in a given ordered sequence</b> <b>N03.04 identify missing numbers in parts of a given number chart and on a number line</b> <b>N03.05 identify errors in a given number chart and on a number line</b>	<b>N02</b> Students will be expected to compare and order numbers to 10 000.	<b>N01</b> Students will be expected to represent and partition whole numbers to 1 000 000.	<b>N01</b> Students will be expected to demonstrate an understanding of place value for numbers greater than one million and less than one-thousandth.	<b>N07</b> Students will be expected to compare, order, and position positive fractions, positive decimals (to thousandths), and whole numbers by using benchmarks, place value, and equivalent fractions and/or decimals.
<b>PLACE VALUE – WHOLE NUMBERS</b>	<b>N05</b> Students will be expected to illustrate, concretely and pictorially, the meaning of place value for numerals to 1000.	<b>N01</b> Students will be expected to represent and partition whole numbers to 10 000.	<b>N01</b> Students will be expected to represent and partition whole numbers to 1 000 000.	<b>N01</b> Students will be expected to demonstrate an understanding of place value for numbers greater than one million and less than one-thousandth.	<b>N07</b> Students will be expected to compare, order, and position positive fractions, positive decimals (to thousandths), and whole numbers by using benchmarks, place value, and equivalent fractions and/or decimals.

**NUMBER PROGRESSION: DECIMAL NUMBERS**

TOPIC	MATHEMATICS 3	MATHEMATICS 4	MATHEMATICS 5	MATHEMATICS 6	MATHEMATICS 7
<b>REPRESENTING DECIMAL NUMBERS</b>	NA	<b>N09</b> Students will be expected to describe and represent decimals (tenths and hundredths) concretely, pictorially, and symbolically.	<b>N08</b> Students will be expected to describe and represent decimals (tenths, hundredths, and thousandths) concretely, pictorially, and symbolically.	<b>N01</b> Students will be expected to demonstrate an understanding of place value for numbers greater than one million and less than one-thousandth.	<b>N04</b> Students will be expected to demonstrate an understanding of the relationship between positive terminating decimals and positive fractions and between

		<p><b>N10</b> Students will be expected to relate decimals to fractions and fractions to decimals (to hundredths).</p>	<p><b>N09</b> Students will be expected to relate decimals to fractions and fractions to decimals (to thousandths).</p> <p><b>N10</b> Students will be expected to compare and order decimals (to thousandths) by using benchmarks, place value, and equivalent decimals.</p>		<p>positive repeating decimals (with one or two repeating digits) and positive fractions.</p> <p><b>N07</b> Students will be expected to compare, order, and position positive fractions, positive decimals (to thousandths), and whole numbers by using benchmarks, place value, and equivalent fractions and/or decimals.</p>
<p><b>COMPARING AND ORDERING DECIMAL NUMBERS</b></p>	<p>NA</p>	<p><b>N09</b> Students will be expected to describe and represent decimals (tenths and hundredths) concretely, pictorially, and symbolically.</p>	<p><b>N08</b> Students will be expected to describe and represent decimals (tenths, hundredths, and thousandths) concretely, pictorially, and symbolically.</p> <p><b>N10</b> Students will be expected to compare and order decimals (to thousandths) by using benchmarks, place value, and equivalent decimals.</p>	<p><b>N01</b> Students will be expected to demonstrate an understanding of place value for numbers greater than one million and less than one-thousandth.</p>	<p><b>N07</b> Students will be expected to compare, order, and position positive fractions, positive decimals (to thousandths), and whole numbers by using benchmarks, place value, and equivalent fractions and/or decimals.</p> <p><b>N04</b> Students will be expected to demonstrate an understanding of the relationship between positive terminating decimals and positive fractions and between positive repeating decimals (with one or two repeating digits) and positive fractions.</p>
<p><b>PLACE VALUE – DECIMAL NUMBERS</b></p>	<p>NA</p>	<p><b>N09</b> Students will be expected to describe and represent decimals (tenths and hundredths) concretely, pictorially, and symbolically.</p>	<p><b>N08</b> Students will be expected to describe and represent decimals (tenths, hundredths, and thousandths) concretely, pictorially, and symbolically.</p> <p><b>N10</b> Students will be expected to compare and order decimals (to</p>	<p><b>N01</b> Students will be expected to demonstrate an understanding of place value for numbers greater than one million and less than one-thousandth.</p>	<p><b>N07</b> Students will be expected to compare, order, and position positive fractions, positive decimals (to thousandths), and whole numbers by using benchmarks, place value, and equivalent fractions and/or decimals.</p>

			thousandths) by using benchmarks, place value, and equivalent decimals.		<b>N04</b> Students will be expected to demonstrate an understanding of the relationship between positive terminating decimals and positive fractions and between positive repeating decimals (with one or two repeating digits) and positive fractions.

MEASUREMENT PROGRESSION					
TOPIC	MATHEMATICS 3	MATHEMATICS 4	MATHEMATICS 5	MATHEMATICS 6	MATHEMATICS 7
MEASUREMENT - LENGTH	<p><b>M03</b> Students will be expected to demonstrate an understanding of measuring length (cm, m) by</p> <ul style="list-style-type: none"> <li>▪ selecting and justifying referents for the units centimetre or metre (cm, m)</li> <li>▪ modelling and describing the relationship between the units centimetre or metre (cm, m)</li> <li>▪ estimating length using referents</li> <li>▪ measuring and recording length, width, and height</li> </ul> <p><b>M05</b> Students will be expected to demonstrate an understanding of perimeter of regular, irregular, and composite shapes by</p> <ul style="list-style-type: none"> <li>▪ estimating perimeter using referents for centimetre or metre (cm, m)</li> <li>▪ measuring and recording perimeter (cm, m)</li> <li>▪ create different shapes for a given perimeter (cm, m) to demonstrate that many shapes are</li> </ul>		<p><b>M02</b> Students will be expected to demonstrate an understanding of measuring length (mm) by</p> <ul style="list-style-type: none"> <li>• selecting and justifying referents for the unit millimetre (mm)</li> <li>• modelling and describing the relationship between millimetre (mm) and centimetre (cm) units, and between millimetre (mm) and metre (m) units</li> </ul>		

	possible for a perimeter				
MEASUREMENT – PERIMETER			<p><b>M01</b> Students will be expected to design and construct different rectangles, given a perimeter or an area or both (whole numbers), and make generalizations.</p>	<p><b>M03</b> Students will be expected to develop and apply a formula for determining the</p> <ul style="list-style-type: none"> <li>▪ perimeter of polygons</li> <li>▪ area of rectangles</li> <li>▪ volume of right rectangular prisms</li> </ul>	
MEASUREMENT - MASS	<p><b>M04</b> Students will be expected to demonstrate an understanding of measuring mass (g, kg) by</p> <ul style="list-style-type: none"> <li>▪ selecting and justifying referents for the units gram and kilogram (g, kg)</li> <li>▪ modelling and describing the relationship between the units gram and kilogram (g, kg)</li> <li>▪ estimating mass using referents</li> <li>▪ measuring and recording mass</li> </ul>				
MEASUREMENT - VOLUME			<p><b>M03</b> Students will be expected to demonstrate an understanding of volume by</p> <ul style="list-style-type: none"> <li>• selecting and justifying referents for cubic centimetre (cm<sup>3</sup>) or cubic metre (m<sup>3</sup>) units</li> <li>• estimating volume using referents for cubic centimetre (cm<sup>3</sup>) or cubic metre (m<sup>3</sup>)</li> <li>• measuring and recording volume (cm<sup>3</sup> or m<sup>3</sup>)</li> </ul>	<p><b>M03</b> Students will be expected to develop and apply a formula for determining the</p> <ul style="list-style-type: none"> <li>▪ perimeter of polygons</li> <li>▪ area of rectangles</li> <li>▪ volume of right rectangular prisms</li> </ul>	

			<ul style="list-style-type: none"> <li>constructing rectangular prisms for a given volume</li> </ul>		
MEASUREMENT - CAPACITY			<p><b>M04</b> Students will be expected to demonstrate an understanding of capacity by</p> <ul style="list-style-type: none"> <li>describing the relationship between millilitre (mL) and litre (L) units</li> <li>selecting and justifying referents for millilitre (mL) and litre (L) units</li> <li>estimating capacity using referents for millilitre (mL) and litre (L)</li> <li>measuring and recording capacity (mL or L)</li> </ul>		
MEASUREMENT - AREA		<p><b>M03</b> Students will be expected to demonstrate an understanding of area of regular and irregular 2-D shapes by</p> <ul style="list-style-type: none"> <li>recognizing that area is measured in square units</li> <li>selecting and justifying referents for the units square centimetre (cm<sup>2</sup>) or square metre (m<sup>2</sup>)</li> <li>estimating area using referents for cm<sup>2</sup> or m<sup>2</sup></li> <li>determining and recording area (cm<sup>2</sup> or m<sup>2</sup>)</li> <li>constructing different rectangles for a given area (cm<sup>2</sup> or m<sup>2</sup>) in order to demonstrate that many different rectangles may have the same area</li> </ul>	<p><b>M01</b> Students will be expected to design and construct different rectangles, given a perimeter or an area or both (whole numbers), and make generalizations.</p>	<p><b>M03</b> Students will be expected to develop and apply a formula for determining the</p> <ul style="list-style-type: none"> <li>perimeter of polygons</li> <li>area of rectangles</li> <li>volume of right rectangular prisms</li> </ul>	<p><b>M02</b> Students will be expected to develop and apply a formula for determining the area of triangles, parallelograms, and circles.</p>

MEASUREMENT - TIME	<p><b>M01</b> Students will be expected to relate the passage of time to common activities using <b>non-standard</b> and standard units (minutes, hours, days, weeks, months, years).</p> <p><b>M02</b> Students will be expected to relate the number of seconds to a minute, the numbers of minutes to an hour, the numbers of hours to a day, and the number of days to a month in a problem-solving context.</p>	<p><b>M01</b> Students will be expected to read and record time using digital and analog clocks, including 24-hour clocks.</p> <p><b>M02</b> Students will be expected to read and record calendar dates in a variety of formats.</p>			
MEASUREMENT - CIRCLES					<p><b>M01</b> Students will be expected to demonstrate an understanding of circles by</p> <ul style="list-style-type: none"> <li>▪ describing the relationships among radius, diameter, and circumference</li> <li>▪ relating circumference to pi</li> <li>▪ determining the sum of the central angles</li> <li>▪ constructing circles with a given radius or diameter</li> <li>▪ solving problems involving the radii, diameters, and circumferences of circles.</li> </ul>
MEASUREMENT - TRIANGLES					

### GEOMETRY PROGRESSION

TOPIC	MATHEMATICS 3	MATHEMATICS 4	MATHEMATICS 5	MATHEMATICS 6	MATHEMATICS 7
3-D OBJECTS	<p><b>G01</b> Students will be expected to describe 3-D objects according to the shape of the faces <b>and</b></p>	<p><b>G01</b> Students will be expected to <b>describe and construct</b></p>	<p><b>G01</b> Students will be expected to describe and provide examples of edges and faces of 3-D</p>	<p><b>M03</b> Students will be expected to develop and apply a formula for determining the</p>	

	the number of edges and vertices.	rectangular and triangular prisms.	objects, and sides of 2-D shapes that are parallel, intersecting, perpendicular, vertical, and horizontal.	<ul style="list-style-type: none"> <li>▪ perimeter of polygons</li> <li>▪ area of rectangles</li> <li>▪ volume of right rectangular prisms</li> </ul>	
<b>2-D SHAPES</b>	<p><b>G02</b> Students will be expected to name, describe, compare, create, and sort regular and irregular polygons, including triangles, quadrilaterals, pentagons, hexagons, and octagons according to the number of sides.</p> <p><b>G01</b> Students will be expected to describe 3-D objects according to the shape of the faces and the number of edges and vertices.</p>	<p><b>G02</b> Students will be expected to demonstrate an understanding of congruency, concretely and pictorially.</p> <p><b>G03</b> Students will be expected to demonstrate an understanding of line symmetry by</p> <ul style="list-style-type: none"> <li>• identifying symmetrical 2-D shapes</li> <li>• creating symmetrical 2-D shapes</li> <li>• drawing one or more lines of symmetry in a 2-D shapes</li> </ul>	<p><b>G01</b> Students will be expected to describe and provide examples of edges and faces of 3-D objects, and sides of 2-D shapes that are parallel, intersecting, perpendicular, vertical, and horizontal.</p> <p><b>G02</b> Students will be expected to name, identify, and sort quadrilaterals, including rectangles, squares, trapezoids, parallelograms, and rhombi, according to their attributes.</p>	<p><b>M03</b> Students will be expected to develop and apply a formula for determining the</p> <ul style="list-style-type: none"> <li>▪ perimeter of polygons</li> <li>▪ area of rectangles</li> <li>▪ volume of right rectangular prisms</li> </ul> <p><b>G01</b> Students will be expected to construct and compare triangles, including scalene, isosceles, equilateral, right, obtuse, or acute in different orientations.</p> <p><b>G02</b> Students will be expected to describe and compare the sides and angles of regular and irregular polygons.</p>	<p><b>G01</b> Students will be expected to perform geometric constructions, including</p> <ul style="list-style-type: none"> <li>▪ perpendicular line segments</li> <li>▪ parallel line segments</li> <li>▪ perpendicular bisectors</li> <li>▪ angle bisectors</li> </ul> <p><b>M02</b> Students will be expected to develop and apply a formula for determining the area of triangles, parallelograms, and circles.</p>
<b>ANGLES</b>			<b>G05</b> Students will be expected to identify right angles.	<p><b>M01</b> Students will be expected to demonstrate an understanding of angles by</p> <ul style="list-style-type: none"> <li>▪ identifying examples of angles in the environment</li> <li>▪ classifying angles according to their measure</li> <li>▪ estimating the measure of angles using 45°, 90°, and 180° as reference angles</li> <li>▪ determining angle measures in degrees</li> <li>▪ drawing and labelling angles when the measure is specified</li> </ul>	

				<b>M02</b> Students will be expected to demonstrate that the sum of interior angles is $180^\circ$ in a triangle and $360^\circ$ in a quadrilateral.	
<b>SORTING 3-D OBJECTS AND 2-D SHAPES</b>			<b>G02</b> Students will be expected to name, identify, and sort quadrilaterals, including rectangles, squares, trapezoids, parallelograms, and rhombi, according to their attributes.		
<b>TRANSFORMATIONAL GEOMETRY</b>			<p><b>G03</b> Students will be expected to perform a single transformation (translation, rotation, or reflection) of a 2-D shape (with and without technology) and draw and describe the image.</p> <p><b>G04</b> Students will be expected to identify and describe a single transformation, including a translation, rotation, and reflection of 2-D shapes.</p>	<p><b>G03</b> Students will be expected to perform a combination of translation(s), rotation(s), and/or reflection(s) on a single 2-D shape, with and without technology, and draw and describe the image.</p> <p><b>G04</b> Students will be expected to perform a combination of successive transformations of 2-D shapes to create a design and identify and describe the transformations.</p> <p><b>G05</b> Students will be expected to identify and plot points in the first quadrant of a Cartesian plane using whole number ordered pairs.</p> <p><b>G06</b> Students will be expected to perform and describe single transformations of a 2-D shape in the first quadrant of a Cartesian plane (limited to whole number vertices).</p>	<p><b>G02</b> Students will be expected to identify and plot points in the four quadrants of a Cartesian plane, using integral ordered pairs.</p> <p><b>G03</b> Students will be expected to perform and describe transformations (translations, rotations, or reflections) of a 2-D shape in all four quadrants of a Cartesian plane (limited to integral number vertices).</p>
<b>STATISTICS AND PROBABILITY PROGRESSION</b>					
<b>TOPIC</b>	<b>MATHEMATICS 3</b>	<b>MATHEMATICS 4</b>	<b>MATHEMATICS 5</b>	<b>MATHEMATICS 6</b>	<b>MATHEMATICS 7</b>

<p><b>DATA MANAGEMENT</b></p>	<p><b>SP01</b> Students will be expected to collect first-hand data and organize it using tally marks, line plots, charts, and lists to answer questions.</p> <p><b>SP02</b> Students will be expected to <b>construct, label,</b> and interpret bar graphs to solve problems.</p>	<p><b>SP01</b> Students will be expected to demonstrate an understanding of many-to-one correspondence.</p> <p><b>SP02</b> Students will be expected to construct and interpret pictographs and bar graphs involving many-to-one correspondence to draw conclusions.</p>	<p><b>SP01</b> Students will be expected to differentiate between first-hand and second-hand data.</p> <p><b>SP02</b> Students will be expected to <b>construct and</b> interpret double bar graphs to draw conclusions.</p>	<p><b>G05</b> Students will be expected to identify and plot points in the first quadrant of a Cartesian plane using whole number ordered pairs.</p> <p><b>SP01</b> Students will be expected to create, label, and interpret line graphs to draw conclusions.</p> <p><b>SP02</b> Students will be expected to select, justify, and use appropriate methods of collecting data, including questionnaires, experiments, databases, and electronic media.</p> <p><b>SP03</b> Students will be expected to graph collected data and analyze the graph to solve problems.</p>	<p><b>G02</b> Students will be expected to identify and plot points in the four quadrants of a Cartesian plane, using integral ordered pairs.</p> <p><b>SP03</b> Students will be expected to <b>construct, label, and interpret circle graphs</b> to solve problems.</p>
<p><b>STATISTICS</b></p>					<p><b>SP01</b> Students will be expected to demonstrate an understanding of central tendency and range by</p> <ul style="list-style-type: none"> <li>• determining the measures of central tendency (mean, median, mode) and range</li> <li>• determining the most appropriate measures of central tendency to report findings</li> </ul> <p><b>SP02</b> Students will be expected to determine the effect on the mean, median, and mode when an outlier is included in a data set.</p>
<p><b>PROBABILITY</b></p>			<p><b>SP03</b> Students will be expected to describe the likelihood of a single</p>	<p><b>SP04</b> Students will be expected to demonstrate</p>	<p><b>SP04</b> Students will be expected to express</p>

			<p>outcome occurring, using words such as <b>impossible</b>, <b>possible</b>, and <b>certain</b>.</p> <p><b>SP04</b> Students will be expected to compare the likelihood of two possible outcomes occurring, using words such as less likely, equally likely, or more likely.</p>	<p>an understanding of probability by</p> <ul style="list-style-type: none"> <li>▪ identifying all possible outcomes of a probability experiment</li> <li>▪ differentiating between experimental and theoretical probability</li> <li>▪ determining the theoretical probability of outcomes in a probability experiment</li> <li>▪ determining the experimental probability of outcomes in a probability experiment</li> <li>▪ comparing experimental results with the theoretical probability for an experiment</li> </ul>	<p>probabilities as ratios, fractions, and percents.</p> <p><b>SP05</b> Students will be expected to identify the sample space (where the combined sample space has 36 or fewer elements) for a probability experiment involving two independent events.</p> <p><b>SP06</b> Students will be expected to conduct a probability experiment to compare the theoretical probability (determined using a tree diagram, table, or other graphic organizer) and experimental probability of two independent events.</p>
