

"Every student deserves to belong (affirmed, validated, and nurtured), be safe, and feel welcomed in all aspects of their daily experience."

—Nova Scotia Inclusive Education Policy, (2019).

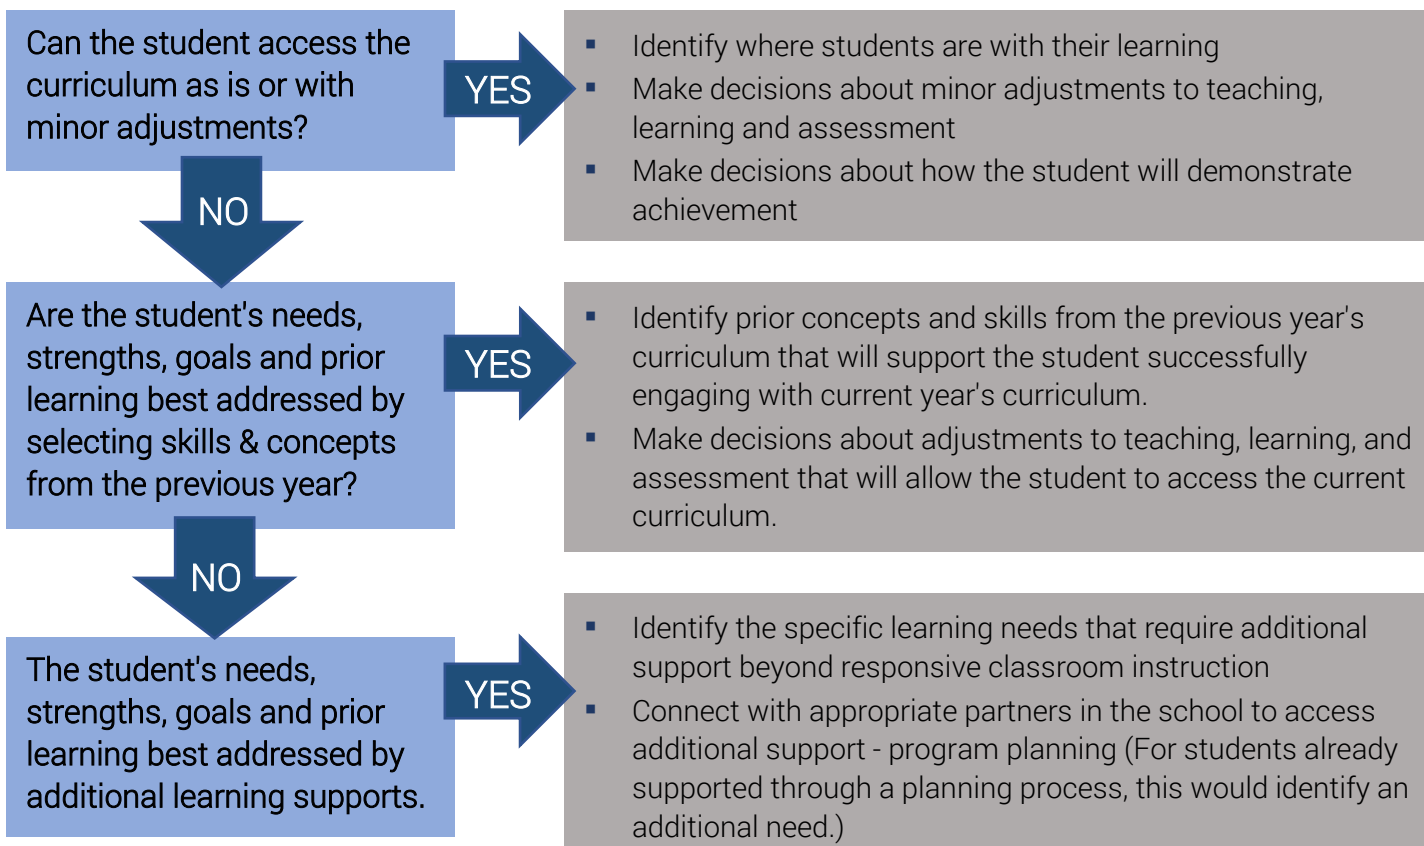

The Nova Scotia Department of Education and Early Childhood Development, Regional Centres for Education, CSAP, and partners are focused on the safety and well-being of students and educators. As we start this school year, the focus will continue to be on thoughtful and intentional instruction to ensure the future success of all students. The importance of ongoing learning and assessment is essential to supporting inclusive and equitable learning environments. The importance of knowing your students and building strong relationships are the cornerstones of the classroom community.

As teachers are aware, a supportive and positive learning environment has a profound effect on students' learning and well-being. In classrooms where students feel physically, socially, emotionally, and culturally safe and are challenged appropriately, they are more likely to be successful. Teachers recognize that not all students progress at the same pace, nor are they equally positioned in terms of their prior knowledge of concepts, skills, and learning outcomes.

Foundational learnings will continue to be the focus for the 2021/2022 school year. This focus, guided by teachers' professional judgement, will provide students with a firm foundation on which to build their learning, moving forward.

How do I support students moving forward?

The flowchart below helps teachers to identify where students are with their learning and to make decisions about responsive teaching and interventions. Following the graphic, teachers will find links to foundational learnings and supplementary support documents pertaining to subject specific areas.

Supporting Learning P-8

The curriculum in P-8 was renewed (2015-2018) to reflect foundational learnings. Supporting learning documents below represent outcomes and suggested instructional and assessment starting points for the school year. Additional information for teachers only is housed on the [e-learning site](#). Decisions about outcomes and supporting documents were made in consultation with teachers, subject specialists, and regional consultants. Please note that Mathematics P-12 was not renewed in this time frame and therefore foundational outcomes have been identified in this area for teachers.
